TECHNICAL SKILLS

Languages: JavaScript, Python, HTML, CSS
Frameworks: React.js, React Native, NodeJS, Express, MongoDB
Developer Tools: VSCode, Git, StackOverflow, Chrome Dev Tools
Others: Bootstrap, Redux, Sass, Material UI, TypeScript

EXPERIENCE

Software Engineer Intern — August 2022 – Present
Neatleaf — *Scotts Valley, CA*
- Architected fullstack applications through the use of modern technologies such as ReactJS, TypeScript, MUI, GraphQL, Apollo Client, etc.
- Colloborated with other team members to improve user experience through adding features and different layouts
- Redesigned and developed solutions to problems with existing layouts and features
- Utilized Git to maintain the application's version and allow collaboration with other developers
- Professionally communicated with team members and team leaders

Web Office Assistant/Support — June 2021 – December 2021
University of Utah Health — *Salt Lake City, UT*
- Improved existing framework by working with an efficient and dedicated team
- Increased user experience by managing websites with the assistance of team web masters and web developers
- Exceeded clients expectations by ensuring clients needs and requests were met with each webpage created

Team USA Olympic Level Athlete — March 2015 – June 2021
US Speedskating — *Salt Lake City, UT*
- Represented U.S.A. on the 2018 Olympic Team in Pyeongchang-gun, Gangwon-do, Korea in the 5000m Relay, 1500m, and 500m. Ranked 5th in the relay, and 12th in the 1500m
- Engaged in training, competing, and coaching to educate, inspire, and provide brand recognition for Team USA
- Multiple-time world-medalist in the Men's relay

PROJECTS

MERN Finance Social App | *github.com/AaronTran206/MERN-finance-social-media-site* June 2022 - August 2022
- Social media site where people can search tickers and post about their financial opinions.
- Utilized MongoDB, Express, React, and Node to deliver a strong front and backend experience for the user.
- Learned and incorporated technologies such as React Charts JS, and React Navigation for greater user experience within the site.

LoL In-House Team Randomizer | *github.com/AaronTran206/LoLTeamRandomizer* May 2022 – May 2022
- Integrated a redux store to persist player states and share data with other components.
- Created good user-experience and responsive components with Sass and Bootstrap.
- Architectured the application in a way that would allow for easily understandable and manageable data flow.

Japanese Dictionary Extension | *github.com/AaronTran206/japanese-extension* March 2022 – April 2022
- Japanese dictionary Google Chrome extension that shows all Japanese words that relate to an input value
- Compiled code into a single file with webpack to make code lightweight
- Caught early errors in the building process by engineering with Typescript
- Hosted a backend database with NodeJS

EDUCATION

Eccles School of Business — Salt Lake City, UT
Bachelors of Science in Finance — *Graduated Summer 2022*
- GPA: 3.6
- ACE — USOC Tuition Grant
- Python for Finance Course
- uDemy JavaScript and TypeScript courses
